EDUCATION

Kingston University
BSc, Computer Science (Hons)

Sept 2015 – May 2018, Kingston
Awarded a First Class

COMMERCIAL EXPERIENCE

CoLoop AI
Full-stack Developer (contract)

Aug 2023 – Oct 2023, Remote

Tech: JavaScript, TypeScript, React, Python, HTML5, CSS3, Git, AWS, Docker, PostgreSQL, tRPC

- Engineer application features with a focus on user experience (UX)
- Account for ambiguities in tasks, accounting for anything the spec may not clearly outline
- Provide valuable insights and apply my own expertise to ensure the quality of the product is improved

NTT Data
Senior Consultant/ Front-end Developer

Mar 2022 – Jan 2023, Remote

Tech: JavaScript (ES6), TypeScript, React, React Native, GraphQL, Node, Postgres, MongoDB, HTML5, CSS3, Git, Jira, Agile Scrum, Unit Testing, Jest, React Testing Library, Redux/ Redux-toolkit

- Deploy features in sprints and ensure both business and client are satisfied
- Review merge requests
- Write clean, functional code – refactoring when given the opportunity
- Take ownership and liaise with team members and clients to ensure high quality work is delivered
- Lead knowledge sharing sessions

Moblox
Front-end React Developer

Oct 2021 – Mar 2022, Remote

Tech: JavaScript (ES6), TypeScript, React, Next, GraphQL, AWS, HTML5, CSS3, Git, Storybook, NX, Atomic Design, Mobile-First, Unit Testing, Styled Components, Emotion

- Create excellent functional user interfaces that implement the best UX practices
- Build robust internal systems and tailor external libraries and APIs to fit the business's needs
- Utilise modern development methodologies such as Atomic Design

Salespoint Ltd
Full Stack Developer

Aug 2020 – Sep 2021, Remote

Tech: JavaScript, Vue, HTML5, CSS3, SQL, Git

- Engage with the business; agree on and scope out deliverables; deliver
- Contribute to our in-house library
- Mentor our apprentice

PROJECT SHOWCASE

Oasis Blog v2

A Full Stack app that provides users with a WordPress-like experience, enabling them to author and manage their personal blog. It comes equipped with a fully functional dashboard that enables authors to create their own unique content and brand. Originally built with the MEVN stack (Mongo, Express, Vue, Node).

Tech Stack: JavaScript (ES6), TypeScript, React, Next, GraphQL, Git, HTML5, CSS3, Tailwind

Legal Mentors Network

Legal Mentors Network is a social network cross platform mobile app that connects law professionals with students and graduates. The app comes with swipe-based matchmaking, instant messaging and many more features. It factors in the user's location and interests when executing the matchmaking algorithm. The app is currently in development but access to the source code can be provided.

Tech Stack: Flutter, Dart, Rust, PocketBase, Riverpod State Management, Docker, SQLite, Git, OOP, Caching

Salah Times v3

A remake of the original Salah Times app. Salah Times is a mobile friendly app that consumes a prayer times API to display the prayer times for London. The latest version of Salah was created to fix unnecessary complexities in the original as well as to experiment with emerging technologies. With this iteration, I used React (as opposed to Vue 2 and Vue 3), Typescript, Next and Tailwind.

Tech Stack: JavaScript (ES6), Typescript, React, Next, HTML5, CSS3, Tailwind, Git, Mobile-First

Pokedex

Pokedex is a web application that allows users to learn more about Pokémon. The application consumes data from the PokéAPI and renders the results on screen. It uses a caching mechanism to reduce the number of calls to the rest api. This means that users can quickly and easily access information about Pokémon. The application also includes a detailed information page for each Pokémon, which includes information such as the Pokémon's stats, types and more.

Tech Stack: JavaScript (ES6), TypeScript, React, HTML5, CSS3
